There are a number of data collection tools that have been established by Statistics Canada to monitor child and youth health outcomes including: . In addition, it will decrease duplication, freeing up human resources to provide more robust services for children and youth.

Several medications are available to help reduce the secretion of gastric acid. The Western lifestyle has a Percy the Puffer (Childrens Asthma) to answer for, and we can add asthma to the list, write Simon Phipps and Al Amin Sikder. Throughout the consultation process, individuals involved in the local implementation of programs commented on the need to place more emphasis on 'doing', rather than studying and then re-studying issues without actually implementing solutions or applying translational knowledge that will improve health outcomes in children and youth.

Eat smaller meals. No discussion of enhancements and additions to the health. no clear data exists that provides meaningful direction for the types of programs that will reduce youth suicides.
