The proposal addresses the criterion in question well but certain improvements are necessary. In the process of doing this, however, we will also challenge theories of translation within the humanities by juxtaposing them with the scientific practice of KT.

No less important than such infrastructure was outward appearance. These measures occurred in the context of the politics of public austerity, cost-cutting and competition since the mids. Social science scholars have drawn attention to the potential for health research participation to constitute exploitation, empowerment or even a form of contemporary citizenship. Academic research on this topic is still lacking and uneven. One particularly contentious issue in this regard was the distribution of resources and duties across the collaborative network. It began with activities aimed at enhancing the knowledgebase of the European RD research landscape as well as issuing two transnational calls in and
