The treatment is then guided by this target organ and leads to
surgical techniques hysterectomy, prostatectomy. A positive
diagnostic response to an anesthetic block of the pudendal
nerve was required and also the persistence of perineal pain
in spite of at least two steroid blocks. Gen- eral accepted
selection criteria are found in Table 2.

In addition, SCS was not able to suppress the conduction of cardiac pain signals.
Brown invented a stereotactic apparatus based on the novel
discovery of the CT scanner for three-dimensional
visualisation of the intracranial content. Overall rating No
ratings yet 0.

Patients were assigned randomly to one of the two treatment groups: surgery or
Kocer. Bleeding was considered light when there was no need of
bandage changes; moderate when bandage changes were needed and
severe one when there was need of nasal packing by using Foley

probe.
